CYBERSECURITY & IT PROFESSIONAL | DIGITAL FORENSICS | SECURITY OPERATIONS

M.S. Digital Forensics & Cybersecurity candidate with experience in identity support, endpoint troubleshooting, network traffic analysis, and simulated security investigations. Skilled in Python, SIEM investigations, digital forensics, and cross-functional IT support.

TECHNICAL SKILLS

Security: Splunk, Wireshark, phishing investigation, Snort, Nmap, Kali Linux, Active Directory, Duo MFA, incident response labs | Programming: Python, C++, SQL, Bash, PowerShell, JavaScript | Systems & Tools: Windows, macOS, Linux, Microsoft 365, ServiceNow, Track-It!, AWS, Azure, Power BI, Git

RELEVANT EXPERIENCE

IT Support Assistant | CUNY John Jay College of Criminal Justice | Feb 2025–Present

- Support university technology services for an environment serving 15,000+ users; troubleshoot Active Directory, Duo MFA, Microsoft 365, and account access issues.
- Investigate reported phishing and suspicious account activity, document security concerns, and escalate suspected incidents to appropriate teams.
- Resolve Windows, macOS, endpoint, and network connectivity problems; document troubleshooting and outcomes in ServiceNow and Track-It!.

IT Analyst Intern | Rose Associates | Jul 2024–Aug 2024

- Created Power BI dashboards to communicate operational trends and support reporting for business stakeholders.
- Automated data-collection and audit-support tasks using Power Automate; supported endpoint imaging and SharePoint access management.

IT Intern | Concern Worldwide U.S. | Jun 2023–Aug 2023

- Provided Tier 1/2 IT support for onsite and remote employees, resolving account, application, hardware, and connectivity issues.
- Improved hardware inventory tracking with a barcode system and maintained SharePoint access permissions and file organization.

Data Management & Analytics Intern | Johnson & Johnson | Feb 2022–Jul 2022

- Classified sensitive information with HIPAA- and PCI-related handling requirements and supported application inventory and archiving during corporate separation.
- Prepared Power BI KPI reports and data-management summaries for stakeholders.

SELECTED TECHNICAL PROJECTS

Splunk Malware & IOC Investigation | Splunk, SPL, Security Logs

- Correlated simulated authentication, web, and file-upload logs to identify suspicious activity and document malware indicators.

AI vs. Traditional Intrusion Detection | Python, Machine Learning

- Compared machine-learning and traditional intrusion detection approaches across attack datasets using detection accuracy, false positives, and response time.

Digital Forensics & Timeline Reconstruction | Python, Kali Linux, SHA-256

- Recovered files, extracted metadata, verified hashes, and assembled investigation timelines from forensic evidence.

Network DoS Mitigation & Packet Analysis | nginx, Wireshark

- Tested controlled Slowloris traffic, implemented lab server protections, and compared network behavior before and after mitigation.

EDUCATION & CERTIFICATIONS

M.S. Digital Forensics & Cybersecurity, John Jay College | Expected May 2028
B.S. Computer Science & Information Security, John Jay College | Sep 2025
AWS Certified Cloud Practitioner | CompTIA A+ | Google IT Support Professional Certificate
CompTIA Security+ (in progress)
